DRAWINGS

If you want to push new presentations to your screen and if you want have remotely controll and manage your screens online: use "SignControll"-software.

In short:

- You/We can install on the Android/Windows (Touch)screens the "SignControll App".
- This app communicates with online platform "Sign Controll".
- You can login in this online platform, with your own login details. You will login on your own page.
- Online platform you can find in the sub-pages:
    - Devices:
        See all you screens in the field; currently status / what it is playing / scheduled playing / add/change presentation
    - Presentations:
        See all your created presentations
        Create a new presentation in the online platform. In this editor you can choose any layout size / resolution / ratios. You can drag and drop; pictures / video / ticker-info lines, touchscreen layers, slideshows, shapes, weather, online xml data grabbing from external server, queuing, date, time, clock, agenda, room booking. And many more!
    - Scheduler:
        Put your presentation(s) in a agenda to schedule your presentations (per timing, like minuts, hours, days, months etcetera)
        Push the presentations to group of screens, based on meta-tags (f.i. region, branche type, kind of position in store, type of client, etcetera)
    - Logging/Analysis:
        Extract logging information from the system, to analyse which content has been playing on a period of time. Which pages have been touched, which videos have been viewed, which products have been looked up for by the customers.
    - Users:
        You can make multiple users in the online platform system, and give them restrictions when they login to the system. (role-management).
    - Dashboard;
        Overview of all players and summeries of status / errors / etcetera.

Always content on screen:
the iChannel app will "ping" with the server and checks if there is any new content. If new content is available, it will download the presentationto the internal memory, and will play the new content when it is fully downloaded. Also when screen has no internet at a certain period, it will always play the last downloaded presentation.

Screen+App is AutoStart+Play:
It is all retail proof; screen will power on once the powercable is plugged in the AC socket and App will start automatically and play your presentation. With special combination, the administrator can go out of the presentation (also with PIN code).
